

MOHANA PRASATH R

mr0928@srmist.edu.in | 7845379301 | mohanaprasath.in | LinkedIn | GitHub

Professional Summary

Computer Science undergraduate (CGPA 9.29/10) with strong fundamentals in Data Structures & Algorithms, Object-Oriented Programming, DBMS, and Operating Systems. Hands-on experience building full-stack, database-driven, and AI/ML applications in Java, Python, C++, and SQL. Quick learner with a track record of shipping working software independently, seeking to contribute as an Associate Software Engineer / Advanced Associate Software Engineer at Accenture.

Core Technical Skills

Programming Languages:	Java, Python, C++, C, SQL
Core CS Fundamentals:	Data Structures & Algorithms, OOP, DBMS, Operating Systems
Web & Frameworks:	React.js, Next.js, Node.js, Express.js, Flask, FastAPI, REST APIs
Databases & Tools:	MySQL, MongoDB, Git/GitHub, VS Code, Cursor
AI / Machine Learning:	Machine Learning, NLP, PyTorch, Scikit-learn, LLMs, OpenAI API, Ollama

Education

SRM Institute of Science & Technology, Kattankulathur	2027
B.Tech, Computer Science and Engineering	CGPA: 9.29 / 10
SRM Public School, Thuraiyur	2023
Class XII - CBSE, Bio-Maths	80.4%
SRM Public School, Thuraiyur	2021
Class X - CBSE	87.2%

Projects

E-Hospital: AI-Assisted Diagnosis Platform	Full Stack, AI/ML, DBMS
Python, SQL, NLP, Random Forest	
- Developed a full-stack healthcare application that captures patient symptoms and returns AI-assisted disease predictions. - Implemented Random Forest and NLP models for symptom-to-diagnosis prediction; designed patient registration and record-management workflows. - Managed patient records and prediction results through efficient relational database operations.	
Stadium Management System	Database Management
Python, SQL, DBMS	
- Built a Python-based GUI application for ticket booking and event scheduling. - Designed normalized relational schemas and optimized SQL queries to improve data-retrieval efficiency.	
Electricity Usage Pattern Predictor	Machine Learning
Python, Random Forest Regression	
- Built a Random Forest regression model with time-based feature engineering to forecast household electricity consumption. - Handled end-to-end data preprocessing, feature extraction, and model evaluation to surface usage insights.	
Cache Memory Simulator	Computer Architecture
React.js, Node.js, Express.js	
- Built an interactive simulator visualizing cache hits, misses, and replacement policies in real time. - Exposed RESTful APIs for memory-access simulation and cache-state management with an intuitive analysis UI.	

Certifications

MongoDB Associate Developer MongoDB	Apr 2026
Introduction to Machine Learning NPTEL	Oct 2025
Data Structures Udemy	Nov 2024
Programming in Java NPTEL	Dec 2024
Programming in C++ Udemy	Apr 2024
Real-Time Operating Systems: Design and Implementation Udemy
